Consumer Reports Alert

May 07, 2009

Consumer Reports magazine has informed us of an error in their June Issue, which includes a road test of the Toyota Venza. In the story, the magazine incorrectly lists Venza?s all-wheel-drive system as a ?low.? *Consumer Reports* says this ??was clearly uncalled for? and will run a correction in the July issue. The on-line version of the story has been corrected.
