Toyota is raising the bar again for adventure-ready SUVs with the 2027 Toyota 4Runner, a vehicle engineered to honor its legendary heritage while continuing to evolve for modern explorers.

Building on the current generation and following the formula established in the 2026 Toyota 4Runner, the 2027 model carries forward the rugged body-on-frame capability, everyday utility, and authentic off-road credentials that have long defined the nameplate. For 2027, Toyota adds meaningful updates across the lineup, including more standard comfort on core grades—highlighted by newly standard heated and power-adjustable front seats—while TRD Pro adds standard red tow hooks and the distinctive new exclusive color Hot Honey.
