The Toyota Tacoma has long been the undisputed champion of the mid-size pickup segment, and for the 2027 model year, it continues to build on its legacy of rugged capability, legendary reliability, and advanced technology. The 2027 Tacoma remains a formidable adventure machine, offering a diverse lineup of grades

tailored to every lifestyle, from the work-ready SR to the overlanding-focused Trailhunter.

For 2027, Toyota has refined the Tacoma’s packaging structure to offer greater transparency and value to customers, ensuring that the most sought-after technology and comfort features are easier to configure than ever before. Adding to this enhanced value and everyday comfort, power front driver’s seats are now standard equipment across all four-door trims SR5 and above. The popular SR5 grade also elevates its curb appeal, now featuring sleek dark silver alloy wheels.
