Bio: Parker Kligerman, NASCAR driver (resides in Westport, Conn.)

The 22-year old Parker Kligerman has not come to the top levels of NASCAR on a typical path. Unlike many drivers who hail from a family steeped in racing tradition, Kligerman had no family ties to racing. What he had was a dream to pursue a career in motorsports and the determination to reach the highest levels of the sport. From his humble beginnings at the local Kart tracks of Connecticut, Kligerman has achieved remarkable results since and has become one of stock car racing's most promising young talents.

Build Shop: Detroit Speed, Inc.

Dream Build Inspiration: Kyle Busch Motorsports and Kligerman teamed up with last year's winner of the Dream Build Challenge, Detroit Speed, Inc., to take on a Camry project that will rock your world. Rally races throw cars on courses with everything from tarmac to dirt (sometimes even mud and snow), making the ability to handle a variety of conditions a requirement. The CamRally sports a rally-themed design, with aggressive and adjustable suspension, turbonetics turbocharged power and an awesome wheel and tire package from Formula43 and BFGoodrich.

CamRally
