

2026 Toyota C-HR

May 14, 2025

Image not found or type unknown

The 2026 Toyota C-HR Battery Electric Vehicle (BEV) is a bold EV with cutting-edge style and a performance-inspired spirit. With an impressive 338 horsepower combined system output, and standard All-Wheel Drive, it has a manufacturer estimated 0-60 mph time of around 5 seconds. The C-HR couples its dynamic drive with a

coupe-like design, a well-appointed interior, and up-to 25.4-cubic feet of rear cargo space behind the rear seats. It also has flexible charging options, with DC fast charging and Level 2 AC charging capabilities. The 2026 C-HR BEV is expected to arrive at Toyota dealerships in 2026.
