

Toyota Recalls Certain 2022-2025MY Toyota Tundra Trucks

May 15, 2025

PLANO, Texas (May 15, 2025) — Toyota is conducting a safety recall involving certain MY2022-25 Tundra and Tundra Hybrid vehicles. Approximately 443,000 vehicles are involved in this recall for the U.S.

Due to moisture intrusion over time, both reverse lamps on the subject vehicles can stop working. If this occurs, the driver's view to the rear can be limited when backing during low ambient light conditions, and there may be no indication to others that the vehicle is operating in reverse. This can increase the risk of a crash.

Dealers will replace both reverse lamp assemblies with improved ones, free of charge. In addition, assembly wiring harnesses will be repaired for any subject vehicles identified to have corrosion that has extended into the wire harness connector, free of charge.

Toyota will notify customers by mid-July 2025.

Information about automotive recalls, including but not limited to the list of involved vehicles, is current as of today's filing date and is subject to change thereafter. To see if your vehicle is involved in a safety recall visit [Toyota.com/recall](https://toyota.com/recall) or nhtsa.gov/recalls and enter your Vehicle Identification Number (VIN) or license plate information.

For any additional questions, Toyota customer support is also available by calling the Toyota Brand Engagement Center (1-800-331-4331).
