

New Toyota Supra: Interview with Chief Engineer Tetsuya Tada

July 25, 2018

Image not found or type unknown

The first Supra model was produced in 1978, and 40 years later the hotly anticipated, all-new fifth-generation model has been revealed in prototype form. It's been experienced dynamically at the famous [Goodwood Festival of Speed](#) hill course and showcased statically at a special [invite-only event for Supra enthusiasts](#).

At all times, chief engineer Tetsuya Tada has proudly accompanied his 'new baby' and been eager to reveal tantalising glimpses into its development and specifications.

Full interview can be read [here](#).
