TOYOTA

PLANO, Texas (Feb. 20, 2018) – Toyota Motor North America, Inc. today announced that it is conducting separate safety recalls in the U.S. of approximately 8,800 Model Year 2017 Tundra and approximately 65,000 Model Year 2018 Sequoia and Tundra vehicles.

Model Year 2017 Tundra
In the involved vehicles with second row seats, there is a possibility that one or more of the bolts attaching the left rear seat to the floor may not have been properly fastened. A seat with improperly fastened bolts may lead to an increased risk of injury in the event of a crash.

For all involved vehicles, Toyota dealers will properly tighten the bolts at no cost to customers. All known owners will receive a notification by first-class mail starting in the middle of March.

Model Year 2018 Sequoia and Tundra
In the involved vehicles, there is a possibility that a vehicle diagnostic function may unnecessarily turn off the Vehicle Stability Control System and affect other systems. If this occurs, warning lights and messages will be displayed, and a warning chime will sound. Turning off Vehicle Stability Control could increase the risk of a
For all involved vehicles, Toyota dealers will update the software in an electronic control unit at no cost to customers. All known owners will receive a notification by first-class mail starting in the middle of March.

Information about automotive recalls, including but not limited to the list of involved vehicles, is subject to change over time. For the most up-to-date Safety Recall information on Toyota, Lexus or Scion vehicles, customers should check their vehicle’s status by visiting toyota.com/recall and enter the Vehicle Identification Number (VIN). Safety Recall inquiry by individual VIN is also available at the NHTSA site: nhtsa.gov/recalls.

For any additional questions, customer support is also available by calling the Toyota Customer Experience Center at 1.800.331.4331 or the Lexus Guest Experience Center at 1.800.255.3987.
