The 2026 Toyota Highlander gas models bring powerful efficiency and spacious style to the midsize SUV category. For 2026, all Highlander gas models now add standard All Wheel Drive to the equation. Its high-torque, high-efficiency 2.4-liter turbocharged four-cylinder engine has 265-horsepower and uses balance shafts

for super-smooth performance, delivering 310 lb.-ft. of torque. Just as important, it also has a manufacturer estimated 24 MPG combined rating. And with Highlander's 7- or 8-person seating and generous cargo capacity, it's an SUV that's made to make the everyday an elevated experience.
