

# Toyota Recalls Certain Toyota Camry and Corolla Cross Hybrid Vehicles

December 16, 2025

**PLANO, Texas (Dec. 16, 2025)** — Toyota is conducting a safety recall involving certain model year 2025-2026 Toyota Camry and 2026 Corolla Cross Hybrid vehicles. Approximately 55,000 Toyota vehicles are involved in this recall in the U.S.

A bolt inside the inverter in the hybrid powertrain can become loose and could lead to a loss of motive power or could lead to a fire when the vehicle is on. A loss of motive power while driving at higher speeds or a vehicle fire could increase the risk of a crash or an injury.

All known owners of the subject vehicles will be informed that they will be contacted when further information is available about the repair remedy. The remedy will be free of charge.

Customers will be notified about this issue by mid-February 2026.

Information about automotive recalls, including but not limited to the list of involved vehicles, is current as of today's filing date and is subject to change thereafter. To see if your vehicle is involved in a safety recall visit [Toyota.com/recall](https://Toyota.com/recall) or [nhtsa.gov/recalls](https://nhtsa.gov/recalls) and enter your Vehicle Identification Number (VIN) or license plate information.

For any additional questions, Toyota customer support is also available by calling the Toyota Brand Engagement Center (1-800-331-4331).
