A few years ago, Toyota turned the off-roading world upside down when it introduced the IsoDynamic Performance Seat in the new Tacoma TRD Pro.

The seat, which has a built-in suspension that helps mitigate bodily impact on rough terrain, was both functional and eye catching.

But it's not without its learning curve. How do you use it, exactly?

Well, we have a team member who played a key role in its development — Todd Muck, executive engineer in Product Development with Toyota Motor North America Research & Development — to give us some pointers.

Take a look at the video below.
