The all-new 2028 Toyota Highlander brings stunning style, everyday utility with three-row seating for up to seven and a powerful battery electric powertrain. It will come in XLE and Limited grades, have available Front- or All-wheel drive, and have a manufacturer estimated range of 315 miles on the XLE AWD and Limited AWD

models equipped with a 95.8-kWh battery. Its exterior has broad fenders and modern details like full-width daytime running lights and flush electronic door handles. Inside, the cabin is modern and user-friendly with a standard 14-inch touchscreen, digital gauge cluster, fully customizable ambient lighting, and smart interior storage. With the latest Toyota tech, including the newest Toyota Audio Multimedia and Toyota Safety Sense systems, and bi-directional vehicle-to-load capability, it’s the all-new generation Highlander that’s built for the future.
