Coming in hot for 2027, the Toyota GR86 returns with a series of focused enhancements designed to deepen the connection between driver, car and road. The GAZOO Racing team is always working to sharpen the GR lineup year after year, and for 2027 the GR86 benefits from several thoughtful updates aimed at elevating both control

and confidence. Engineers refined throttle calibration for a smoother, more linear response and improved fifth-to-fourth downshift feel for an even more seamless and natural connection during spirited driving. Inside, updated interior treatments further amplify the GR86's focused, driver-centric cockpit, while expanded active safety and convenience technologies help provide added confidence across a wider range of everyday driving situations.
