PLANO, Texas (July 28, 2026) — Toyota is expanding its TRD Pro color palette for 2027 with the introduction of a new Honeycomb exterior color for Tundra, Sequoia and Tacoma, along with a slightly different shade, Hot Honey, for the 4Runner.

Built to stand out on and off the road, the new Honeycomb color gives certain TRD Pro models a bold, high-impact appearance that underscores their adventurous character. For 2027, Tundra and Sequoia TRD Pro models receive purpose-built upgrades designed to enhance their off-road capability, including newly designed and vehicle specific tuned FOX® enhanced QS3 shocks engineered to help provide improved feel, stability and adjustability over rough terrain. Standard red tow hooks add a rugged, functional accent to the exterior, while available ISO-dynamic seats are designed to help support comfort and stability during off-road driving for Tundra and Tacoma.

The 2027 Tundra and 2027 Sequoia press releases have been updated with details about their 2027 TRD Pro models. Those releases are linked [here](#) and [here](#).

Additional details, specifications and pricing for the 2027 Tundra and Sequoia will be announced closer to the start of production in fall 2026.
