

2027 Toyota bZ

August 04, 2026

Image not found or type unknown

The 2027 Toyota bZ is the battery electric vehicle made for confident, everyday all-electric driving. Available in XLE, XLE Plus, and Limited models with available Front- or All-Wheel Drive (FWD or AWD) and a choice of two battery sizes – a 74.7-kWh unit on the XLE AWD, XLE FWD Plus, Limited AWD/FWD models, and a

57.7-kWh unit on the XLE FWD model. The bZ is also DC fast-charging capable with a North American Charging System (NACS) port for access to most high-speed chargers across America. For charging at home, it comes with a standard dual-voltage charging cable. Other great features include SofTex-trimmed seating with fabric or mixed media, depending on grade, a standard 14-inch multimedia screen and customizable interior ambient lighting.
