

Toyota Recalls Certain Model Year 2025-2026 Camry Vehicles

August 06, 2026

PLANO, Texas (Aug. 6, 2026) — Toyota is conducting a safety recall involving certain MY2025-2026 Camry vehicles. Approximately 508,000 vehicles are involved in the recall for the U.S.

The 7-inch combination meter may become blank at startup. This can also deactivate the turn signal and hazard lamps and certain warning buzzer sounds (such as the smart key reminder and the driver/passenger seat belt reminder). This can cause the vehicle not to meet certain federal safety standards. If certain required information is not displayed in the combination meter, if the turn signal/hazard lamps do not function, or if certain warning buzzers do not activate, there can be an increased risk of injury or a crash depending on the specific situation.

All known owners of the subject vehicles will be notified to return their vehicles to a Toyota dealer. The dealers will update the software of the combination meter, free of charge.

For all involved vehicles, Toyota will notify customers by early October 2026.

Information about automotive recalls, including but not limited to the list of involved vehicles, is current as of today's filing date and is subject to change thereafter. To see if your vehicle is involved in a safety recall visit [Toyota.com/recall](https://toyota.com/recall) or nhtsa.gov/recalls and enter your Vehicle Identification Number (VIN) or license plate information.

For any additional questions, Toyota customer support is also available by calling the Toyota Brand Engagement Center (1-800-331-4331).
