

The Graphic Truth About TNGA

August 02, 2017

Toyota New Global Architecture

*Common Process. Common Parts.
Ever-Better Vehicles.*

At its core, Toyota New Global Architecture (TNGA) is about building ever-better vehicles on common platforms with common parts. The aim is to make our manufacturing plants more flexible and responsive to changes in the marketplace.

This flexibility will lead to cost savings that can then be reinvested in future technologies, giving rise to the next generation of ever-better Toyota vehicles. And, in turn, the next. And the next ...
