

New IUCN-Toyota partnership to expand knowledge of threats to global biodiversity

May 10, 2016

Gland, Switzerland, May 10, 2016 — (IUCN) [The International Union for Conservation of Nature](#) (IUCN) and Toyota Motor Corporation (Toyota) today announced a five-year partnership to provide funding to broaden the scope of The [IUCN Red List of Threatened Species](#)[™]. This will significantly increase knowledge on the extinction risk of more than 28,000 species, including many that are key food sources for a significant portion of the global population.

With our planet experiencing extinctions at the fastest rate in its history, IUCN and Toyota believe that there has never been a greater need to understand the current status of the species upon which our survival depends.
