

# Vipin Gupta

Vipin Gupta is group vice president and chief information officer of Toyota Financial Services (TFS). In this role, Gupta leads all aspects of Digital Transformation and Information Technology to transform, grow and expand the business of TFS. He reports to Mark Templin, president and CEO of TFS.

Before joining Toyota in 2018, Gupta served as executive vice president and chief information officer for Key Community Bank, a business unit of KeyBank, where he drove customer-focused digital transformation. Before KeyBank, he served as business information officer at PNC/National City Bank. Prior to that he served as partner at Capgemini and Ernst & Young, where he focused on business transformation at global financial services institutions, launching a SEI CMM Level 5 delivery center and leading Capgemini's global banking innovation practice. In the early years of his career, he served in NIIT's global consulting business where he honed the craft of software engineering through initiatives ranging from large manufacturing business transformation to deployment of mobile apps for hand-held devices.

Gupta has been recognized as a standout winner in innovation by CIO magazine. He holds a Master of Computer Applications degree in computer science and business management from Thapar Institute of Engineering and Technology in Patiala, India.
