

Toyota Doubles Turbo Offerings in New Engine Lineup

April 06, 2015

Toyota City, Japan, April 6, 2015 — Toyota is ready to debut its second turbocharged entry in a series of new engines with drastically improved thermal and fuel efficiency.

The new 8NR-FTS 1.2-liter direct-injection turbo engine will be available as an option for the partially redesigned Auris, which went on sale in Japan today. Like the other entries in Toyota's new engine lineup, development of the 8NR-FTS is a culmination of Toyota's years of hybrid and conventional powertrain development, including breakthroughs in combustion and loss-reduction technologies. As a result, it delivers superb driving performance and acceleration, while also achieving impressive fuel efficiency and world-leading thermal efficiency.
