**TORRANCE, Calif. (April 14, 2015)** – Fifteen years ago, a little hybrid no one knew rolled onto the National Mall to celebrate Earth Day. That hybrid – the Toyota Prius. Tomorrow, nearing the 45<sup>th</sup> anniversary of Earth Day, Toyota will return to Washington, D.C., to showcase yet another revolutionary technology, the hydrogen

fuel cell electric [Toyota Mirai](#). Toyota has partnered with Earth Day Network to sponsor the [Global Citizen 2015 Earth Day](#) celebration, April 17-19, featuring leading environmental voices, government leaders, star-studded performances and a Mirai activation. The celebration marks the beginning of a month of fuel cell features and festivities for Toyota.

"The Toyota Mirai represents a turning point in automotive history," said Bob Carter, senior vice president, automotive operations, Toyota Motor Sales, U.S.A., Inc. "After more than 20 years of research and development, we are excited to bring Mirai to American driveways. Earth Day 2015 is a great platform to educate the public about hydrogen fuel cell technology and the potential of hydrogen as a future fuel."

For many Earth Day celebration attendees, this will be the first up close and personal look at the Mirai. The vehicle combines hydrogen and oxygen to create electricity that powers the electric motor. Water vapor is the only emission. The Mirai will go on sale in California later this year.

"Toyota has been a committed partner in creating solutions and momentum for a cleaner, better planet," said Kathleen Rogers, president of Earth Day Network. "We are proud to help educate about the possibilities for fuel cell technology and advocate around a shared vision for the environment."

Beyond the celebration on the National Mall, Toyota will use the month of April to engage and educate customers about fuel cell technology and hydrogen power, including events in New York and Los Angeles, and digital activities to converse with skeptics and advocates alike.

- Toyota will help New Yorkers mark Earth Day with an interactive display at Union Square Park on April 19.
- Hollywood celebrities will gather for laughs and an opportunity to learn about the Mirai during Waterkeeper Alliance's "Keep it Clean," a star-studded evening of comedy on April 22.

The zero emission Toyota Mirai is a four-door, mid-size sedan with performance similar to traditional internal combustion engines – re-fueling in about five minutes and traveling up to 300 miles on a full tank.
