

2013 Scion Tuner Challenge - Young Tea 001

October 30, 2013

Simpli-tC by YOUNG TEA

Simplicity [Sim.plic-i-tee] *noun* – directness of expression; going back to the basic principle of an ideology. A modified tuner car is anything but simple: interior and exterior appearance are chosen to suit the builders' taste and style, after-market performance upgrades are added to supplement stock parts for optimized drive capability, on top of a whole other slew of accessories for reasons cosmetic or otherwise. The actual premise stems back to Scion's promise to produce an affordable lineup that are not just trendy but are also streamlined for efficiency. Simpli-tC's essence is just that. Going back to basics.
