

Toyota 'Trekker' Starts Public Testing

July 25, 2013

It won't beam you up, but Toyota Motor Corporation's personal transport unit will get you from point A to B. And now the Winglet is headed to the "streets" – actually public sidewalks – in a real-world test of functionality, convenience and safety. Overall, the trials should help determine how the Winglet supports public mobility, improves the environment and invigorates local communities...in other words how it helps us live long and prosper.
