

Toyota Statement Regarding Documents Shared with Congressional Committees

February 21, 2010

Our first priority is the safety of our customers and to conclude otherwise on the basis of one internal presentation is wrong. Our values have always been to put the customer first and ensure the highest levels of safety and quality. Our recently announced top-to-bottom quality review of all company operations, along with new quality initiatives and a renewed commitment to transparency are all designed to reaffirm these values.
