

# 2020 Toyota Prius Prime: A Solution to Rising Gas Prices

May 02, 2019

**TOYOTA**  
**2020  
PRIUS  
PRIME**

**New Sun Visor Extender**  
A new sun visor extender has been added to make driving toward the light a more pleasant experience.

**New Black Interior**  
Black accents replace previous white accents for a more premium feel.

**New 5th Seat**  
A new 5th seat in the rear is now available for even more room - and more friends.

**Standard Compatibility**  
New for 2020, the Prius Prime will offer Standard SiriusXM® and Apple CarPlay®, and Amazon Alexa compatibility. Road trip, anyone?

**Two New USB Ports**  
Two additional USB ports have been added for the rear passengers - for even more ways to connect.

**PLANO, Texas (May 2, 2019)** – Toyota Prius Prime gets many upgrades for 2020 and remains the most efficient Toyota hybrid and one of the best options to protect drivers from price hikes at the gas pump. Available this summer, the Manufacturer’s Suggested Retail Price (MSRP) for the LE grade will be \$27,600, the MSRP for XLE grade will be \$29,500 and the MSRP for Limited grade will be \$33,500.

The word “Prime,” which is defined as being the best, or at the top, is a natural fit for the Prius model as it’s the most technologically advanced, best-equipped Toyota Prius in the model’s nearly two-decade global history. With the power to run in either EV or hybrid driving modes, Prius Prime strikes a harmonious balance between

necessity and desire.

New upgrades for 2020 include:

- New 5<sup>th</sup> seat for even more room
- Standard Apple CarPlay<sup>®</sup>, SiriusXM<sup>®</sup> and Amazon Alexa compatibility
- Two additional 2.1A USB ports for the rear passengers
- Black interior accents to replace previous white accents for a more premium feel
- A new sun visor extender
- A relocation of seat heater buttons for front seat passengers for easier usability
- New grade strategy that offers LE, XLE and Limited Grades

Prius Prime is the most efficient Toyota hybrid yet. When the electric charge goes out, Prius Prime has an EPA-estimated 54 combined mpg. Designed with intelligent tech, premium materials and thoughtful engineering, Prius Prime represents the next step of Toyota's continuous quest to reach more efficient mobility with less range-anxiety—without compromise. With its EPA-estimated 640-mile total driving range and 25-mile EV Mode driving range, Prius Prime continues to raise the efficiency bar to help challenge what's possible. The powertrain is a Toyota first, thanks to a dual-motor drive system that improves acceleration in EV Mode for a fun drive. Prius Prime is also great for commuters as its HOV-approved as a single-occupant green vehicle in some states such as California and New Jersey.
