

# 2019 Toyota Land Cruiser

September 26, 2019

The Toyota Land Cruiser reached a historic milestone in 2018 when it celebrated its 60<sup>th</sup> anniversary in the U.S. market. From its early days as a utility vehicle focused on work over comfort, Land Cruiser has evolved into a flagship SUV. The 2019 Land Cruiser returns with a posh, feature-laden cabin with space for eight. The body-on-frame SUV retains the off-road DNA for which it is known the world over thanks to its full-time 4WD system and features like CRAWL Control and Multi-Terrain Select, and yet its on-road manners are smooth thanks to its Kinetic Dynamic Suspension System (KDSS).
