

Toyota is conducting a safety recall involving certain Corolla and Matrix vehicles

August 28, 2019

PLANO, Texas (August 28, 2019) – Toyota is conducting a safety recall involving certain 2003-2008 Model Year Corolla and 2005-2008 Model Year Matrix vehicles in the United States. Approximately 135,000 vehicles are involved in this recall.

The front passenger airbag in the subject vehicles was repaired under a prior recall. If one of these airbags deploys, there is a possibility that it could be damaged. Such damage could cause the airbag to not properly inflate, and this could increase the risk of occupant injury in the event of a crash.

This recall is about a new and different issue where the airbag may not deploy as designed in certain vehicles that received a remedy as part of previous Takata recalls.

For all involved vehicles, Toyota dealers will replace the front passenger airbag assembly with an improved one at no cost to customers.

Owners of all involved vehicles will be notified by the end of October via first class mail.

Information about automotive recalls, including but not limited to the list of involved vehicles, is current as of today's filing date and is subject to change thereafter. To see if your vehicle is involved in a safety recall visit Toyota.com/recall or nhtsa.gov/recalls and enter your Vehicle Identification Number (VIN) or license plate information.

For the most up to date information surrounding recalls visit nhtsa.gov/recalls. For any additional questions, customer support is also available by calling the Toyota Customer Experience Center at 1.800.331.4331 or the Lexus Guest Experience Center at 1.800.255.3987.
