

2021 Toyota Avalon Hybrid

July 15, 2020

Image not found or type unknown

The Toyota Avalon Hybrid marks its ninth year for 2021. The fifth-generation Avalon, but second with a hybrid variant, was introduced for 2019 and built around the advanced Toyota New Global Architecture (TNGA). The high-strength TNGA is the ideal foundation for an exceptionally athletic luxury-sport sedan and the four-

cylinder Dynamic Force Engine is married to an all-new Toyota Hybrid System II powertrain that's been engineered to inspire both spirited driving and fuel consciousness. All Avalon Hybrids now come standard with Android Auto compatibility, and some get new available exterior and interior colors.
