

# 2021 Toyota Prius Prime

July 14, 2020

Take the best elements of the world's best-selling hybrid, mix in the silent, no-gas EV mode when charged, top it off with Toyota value and durability and you have the Prius Prime. A plug-in-hybrid, the Prius Prime has an astounding 640-mile driving range. New for 2021, the Prius Prime upgrades from Toyota Safety Sense-P to Toyota Safety Sense 2.0 for 2021. Essentially, the Prius Prime takes everything people love about the world's best-selling hybrid vehicle and adds an estimated 25 miles of EV driving range (when fully charged). That's sufficient to handle daily commuting distances for many U.S. drivers.
