For 50 years, Toyota Motor North America Research & Development (TMNA R&D) has led engineering for several of the best-selling Toyota vehicles on U.S. roads. Centered in Ann Arbor, Michigan, TMNA R&D is pursuing Toyota’s mission to “Produce Happiness for All” by making life safer, easier and more enjoyable.

Teams are now creating both next-generation vehicles and new and advanced mobility concepts that can better move people, goods and information.
