

Toyota Statement on PAC Contributions

July 08, 2021

Toyota is committed to supporting and promoting actions that further our democracy. Our company has long-standing relationships with Members of Congress across the political spectrum, especially those representing our U.S. operations. Our bipartisan PAC equally supports Democrats and Republicans running for Congress. In fact, in 2021, the vast majority of the contributions went to Democrats and Republicans who supported the certification of the 2020 election. We understand that the PAC decision to support select Members of Congress who contested the results troubled some stakeholders. We are actively listening to our stakeholders and, at this time, we have decided to stop contributing to those Members of Congress who contested the certification of certain states in the 2020 election.
