

2022 Toyota Tundra i-FORCE MAX

September 20, 2021

Image not found or type unknown

Tundra's new i-FORCE MAX is a hybrid system but one that's built for the demands of full-sized truck. It expands on the core twin-turbo 3.5-liter V6 by brilliantly pairing a motor generator system built inside bell-housing to create an inline hybrid powertrain that produces 437 horsepower and a whopping 583 lb.-ft. of torque.
