Located in Blue Springs, Mississippi, Toyota Motor Manufacturing Mississippi and its team of 2,400 proudly assembles one of the world's top-selling vehicles, Toyota Corolla.

Since breaking ground in 2007 and starting production in 2011, Toyota Mississippi and its suppliers have created nearly 4,000 jobs and invested over \$1.3 billion in the state's economy. The Magnolia State manufacturing plant has only gained speed since inception averaging more than 180,000 units per year and climbing.

In 2018, the Magnolia State manufacturing plant recently upgraded its facility with Toyota's New Global Architecture infrastructure in an effort to be more competitive and agile with its production practices, performance of models and state-of-the-art technology. The highly skilled Toyota Mississippi team is trained and skilled in stamping, welding, painting, assembling and inspecting brand-new Toyota Corollas every day and boasts cutting-edge technology including autonomous mobile robots, laser-weld technology and team member ergonomic devices for wellness and process efficiencies to name a few.

To date, the team of world-renowned experts have produced more than 2 million vehicles and counting.
