Toyota Motor Manufacturing Alabama employs more than 2,400 team members and builds more than 3,000 engines each day. Assembling nearly half of Toyota's engines in North America at its 1.3 million-square-foot facility, TMMAL is the only plant to build four-cylinder, V-6 and twin-turbo under one roof. TMMAL powers popular Toyota vehicles like the Highlander, Sienna, RAV4, Corolla, Corolla Cross, Tundra, Tacoma and Sequoia.
