

2022 Toyota Mirai

November 18, 2021

Mirai means future in Japanese, which is the perfect name for a car that fits into a strategy that also includes Toyota's current and future hybrids and upcoming battery electric vehicles (BEVs), like the recently announced bZ4X. This second-generation Mirai brings a stunning design that doesn't quit, more engaging driving performance and an increased zero emission range of 402 EPA-estimated miles range on the Mirai XLE (previous EPA rating of 312 miles), a nearly 30% increase over the first-generation model.
