

2023 Toyota GR Supra

April 28, 2022

The manual transmission is going strong at TOYOTA GAZOO Racing with a new stick shift option on the 2023 GR Supra. Available on the 3.0, 3.0 Premium and a limited A91-MT Edition model, this newly developed 6-speed manual transmission has been engineered and tuned specifically for use with the coupe's straight-six engine and also features an intelligent Manual Transmission (iMT) programmed with new software that prioritizes sporty performance. The GR Supra's traction and braking have been optimized for operation with a manual transmission. The A91-MT special edition will be a 500 unit limited-run model that comes in two exclusive colors, Matte White and CU Later Gray with unique forged 19-inch Frozen Gunmetal Gray wheels and exclusive Cognac leather-trimmed seats, red Supra badge, and red strut tower braces.
