

Toyota is conducting a safety recall involving 2023 model year bZ4X vehicles

June 23, 2022

PLANO, Texas (June 23, 2022) – Toyota is conducting a safety recall involving 2023 model year bZ4X vehicles in the U.S. Approximately 260 vehicles are involved in this recall.

After low-mileage use, all of the hub bolts on the wheel can loosen to the point where the wheel can detach from the vehicle. If a wheel detaches from the vehicle while driving, it could result in a loss of vehicle control, increasing the risk of a crash. The cause of the issue and the driving patterns under which this issue could occur are still under investigation. **No one should drive these vehicles until the remedy is performed.**

No remedy is available at this time. Until the remedy is available, any authorized Toyota dealer will pick up the vehicle and provide a loaner vehicle FREE OF CHARGE to the owner.

Owners of involved vehicles will be notified through a number of communication channels starting on June 23, 2022.

Information about automotive recalls, including but not limited to the list of involved vehicles, is current as of today's filing date and is subject to change thereafter. To see if your vehicle is involved in a safety recall visit [Toyota.com/recall](https://toyota.com/recall) or nhtsa.gov/recalls and enter your Vehicle Identification Number (VIN) or license plate information.

For any additional questions, customer support is also available by calling the Toyota Brand Engagement Center (1-800-331-4331) for Toyota vehicles.
