

# Toyota Recalls Certain Tundra Model Grades for MY22 and MY23

February 22, 2023

**PLANO, Texas (Feb. 22, 2023)** – Toyota is conducting a safety noncompliance recall involving certain Tundra model grades in North and South America. Approximately 10,000 vehicles are involved in this recall.

The subject vehicles are equipped with a 12.3-inch Thin Film Transistor (TFT) Liquid Crystal Display (LCD) monitor, which is used to display various information such as warning and indicator lights, vehicle gauges, messages and more. The TFT monitor can go blank due to a software issue. A blank monitor creates a noncompliance with certain federal requirements. This can reduce the driver's recognition of certain operating conditions, which can lead to an increased risk of a crash.

For all involved vehicles, Toyota dealers will update the software for the LCD monitor at no cost to customers.

Owners of involved vehicles will be notified by late April 2023.

Information about automotive recalls, including but not limited to the list of involved vehicles, is current as of today's filing date and is subject to change thereafter. To see if your vehicle is involved in a safety recall visit [Toyota.com/recall](https://Toyota.com/recall) or [nhtsa.gov/recalls](https://nhtsa.gov/recalls) and enter your Vehicle Identification Number (VIN) or license plate information.

For any additional questions, customer support is also available by calling the Toyota Brand Engagement Center (1-800-331-4331) for Toyota vehicles.
