

Toyota Recalls Certain 2023 Camry and Camry Hybrid Models

June 15, 2023

PLANO, Texas (June 15, 2023) – Toyota is conducting a safety recall in the U.S. involving certain Toyota Camry and Camry Hybrid vehicles. Approximately 300 vehicles are involved in this recall.

The subject vehicles may have significantly under-tightened lug nuts that may loosen and detach, causing a wheel to detach from the vehicle after low-mileage use. A wheel detaching from a moving vehicle can result in a loss of vehicle control, increasing the risk of a crash. No one should drive these vehicles until the remedy is performed.

For all involved vehicles, Toyota dealers will inspect and re-tighten the lug nuts to proper specification. If any components are found to be damaged, they will be replaced at no cost to owners.

Toyota will notify affected owners about this issue through a number of communication channels beginning on June 15, 2023.

Information about automotive recalls, including but not limited to the list of involved vehicles, is current as of today's filing date and is subject to change thereafter. To see if your vehicle is involved in a safety recall visit [Toyota.com/recall](https://toyota.com/recall) or nhtsa.gov/recalls and enter your Vehicle Identification Number (VIN) or license plate information.

For any additional questions, customer support is also available by calling the Toyota Brand Engagement Center (1-800-331-4331) for Toyota vehicles.
