

Toyota Recalls Certain 2023 Tundra and Tundra Hybrid Models

September 13, 2023

PLANO, Texas (September 13, 2023) – Toyota is conducting a non-compliance safety recall involving certain 2023 model year Tundra and Tundra Hybrid vehicles in the United States. Approximately 21,780 vehicles are involved in this recall.

Due to system errors, the subject vehicles equipped with a Toyota Genuine spray-on bed liner accessory could have received a load-carrying-capacity modification label that does not meet the requirements of a federal standard. A vehicle which is loaded beyond its load carrying capacity may have an increased risk of crash.

For all involved vehicles, Toyota dealers will replace the load carrying capacity modification label with an updated one at no cost to owners. For all involved vehicles, Toyota will notify customers by the middle of November 2023.

Information about automotive recalls, including but not limited to the list of involved vehicles, is current as of today's filing date and is subject to change thereafter. To see if your vehicle is involved in a safety recall visit [Toyota.com/recall](https://toyota.com/recall) or nhtsa.gov/recalls and enter your Vehicle Identification Number (VIN) or license plate information.

For any additional questions, Toyota customer support is also available by calling the Toyota Brand Engagement Center (1-800-331-4331) for Toyota vehicles.
