Powered exclusively by the Super Ultra Low Emissions technology of the Toyota Hybrid System, the Toyota Sienna is one of the most fuel-efficient 7-8 passenger minivans on the market. With more than 2.3 million Sienna models sold since its debut in 1997, the fourth-generation Sienna keeps offering customers the ultimate in

functionality, a choice of FWD or AWD drivetrains, and the benefit of Toyota's 20+ years of global hybrid leadership. The 2024 Sienna lays down impressive numbers, with 245 total system horsepower, and a manufacturer-estimated 36 combined MPG fuel economy (front-wheel drive).
