

# 2024 Toyota Tacoma i-FORCE MAX

April 23, 2024

Image not found or type unknown

The Toyota Tacoma is shaking up the midsize truck segment again with the addition of the i-FORCE MAX hybrid powertrain. The i-FORCE MAX pairs a 2.4-liter engine with a 48-hp electric motor integrated exclusively into the 8-speed transmission for the most powerful powertrain ever offered on Tacoma. With a total

system output of up to 326 horsepower and a whopping 465 lb.-ft. of torque, that's a 75% increase in torque compared to the previous generation V-6 powered truck.
